

Application Nos 2023/04735/PA (full planning application for the creation of an access junction on land at A38 / Ox Leys road / Bulls Lane)

Supplementary Note

It is recommended that a further objection (e) be added in respect of the above application to those contained in the previous Advisory Note as set out below:

The Town Council reiterates comments previously stated in response to consultation on the original outline application for land at Langley (2021/10567/PA) dated 4th May 2022 that the potential for north facing slips on the northern A38 access should be determined from the outset of the development. In their absence the inability of vehicles to leave / enter Langley to / from the north will cause additional pressures and exacerbate problems on the existing highway network which would have a detrimental impact on the local area.
